

**Little Remodeler Playhouse**

Jeannette L. Smith

**REPLACEMENT SHEET****Independent Claims**

What I claim as my invention is:

1. A playhouse kit being made preferably of melamine, white board or of a wood or plastic material when completely finished leaves a paintable outside surface and a clean, slick, nonporous inside surface, comprised of at least four walls, one side including a window (Fig 1C) and one side including a doorway (Fig 1A), a back wall (1B) and a side wall (1D) with no windows or doors, with the said back wall and said side walls of said playhouse being connected with elongated plastic pieces (3A) having two sections connected at a 90 degree angle, each said section having one slot which enables said walls to slide in at a 90 degree angle, said side walls and said front wall being connected with an elongated plastic piece (3B) which is comprised of two sections, one with one slot for the insertion of said side walls at a 90 degree angle and one section with two slots, one for the insertion of said front wall at a 90 degree angle and the other slot allowing for the insertion of additional materials which slide in over the top of said front wall and are used to alter the appearance of said playhouse, said additional materials being elongated
